Sleek & Modern
The tabletop finish is thin and stylish, while its center has normal thickness, as in all isotop tabletops for better base support.

Live Laminate - Resistance to bending
The bottom side of the tabletop is covered with a black laminate of special composition that prevents it from bending.
Surface gains the "ability to feel" when it tends to bend due to excessive heat and UV absorption (especially dark colors) and constantly returns to the correct straight position.

Dry matte finish
Laminate designs become more realistic with dry matte finish.
