Sleek & Modern

The tabletop finish is thin and stylish, while its center has normal thickness, as in all Isotop tabletops for better base support.

Dry matte finish

Laminate designs become more realistic with dry matte finish.

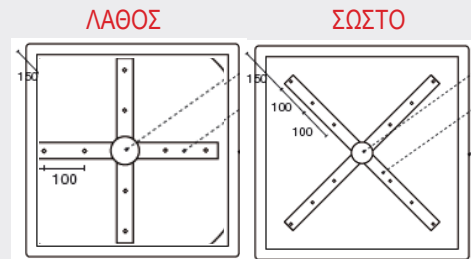

Live Laminate - Resistance to bending

The bottom side of the tabletop is covered with a black laminate of special composition that prevents it from bending.

Surface gains the "ability to feel" when it tends to bend due to excessive heat and UV absorption (especially dark colors) and constantly returns to the correct straight position.
